Barr's Daffodil Catalogue, 1919.

PRACTICAL HINTS ON BULB CULTURE.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky; in such cases plant later when the soil is in a good friable condition. After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Failures with bulbs are most frequently due to their having been planted too deeply or too shallow. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil. The principal exceptions to this rule are Crocuses, which prefer shallow planting, and Erythroniums, Snowdrops and Tulips, which require deeper planting. We give special directions for these bulbs in body of our General Bulb Catalogue.

Manure for Bulbs.—The ammonia in fresh stable manure is fatal to bulbs and is often the cause of failure in growing Tulips, Daffodils, etc., therefore only well-decayed stable or cow manure, or the material from an exhausted hot-bed, should be used. The best general manure for all bulbs growing outdoors is our PHYTOBROMA (which contains in suitable proportions Sulphate of Potash, Steamed Bone Flour, etc.); this should be forked into the ground at planting time at the rate of 3 oz. to the square yard, and a surface dressing of 3 oz. to the square yard applied early in spring (well hoed in) when top growth is showing. For heavy soils BASIC SLAG is good; this should be put in the ground with the bulbs at time of planting at the rate of $7\frac{1}{2}$ oz. to the square yard. For light and sandy soils CRUSHED BONES can be recommended, put into the ground at time of planting at the rate of 2 oz. to the square yard, and after planting sprinkle on the surface of the ground SULPHATE OF POTASH at the rate of $\frac{3}{4}$ oz. per square yard. On hot, dry and sandy soils, old stable manure may with advantage be used, to act as a sponge to hold moisture in the soil; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs. In the case of bulbs which have not been lifted we recommend a top dressing (well hoed in) of PHYTOBROMA or Bone Flour in November and again in January or early February, at the rate of 3 oz. to the square yard. *Price List of Manures will be found on page 31.*

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months of some light material such as long straw litter, cut heather, cut furze branches, or PEAT-FIBRE. *The advantage* of this light covering is that it keeps the surface soil sweet by preventing the heavy winter rains from beating down the earth's crust; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing: thus, where Tulips have been growing last season, plant Daffodils this autumn, and so on.

Time to Plant.—We give this information under the heading of each family in our General Bulb Catalogue.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—September and October are best months for potting most Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand, and *not passed through a sieve*) and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding $1\frac{1}{2}$ lbs. of bone meal or 1 lb. of Phytobroma to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet; *never pot in soil that is wet or sticky*. Our Peat-Fibre, Shell and Charcoal Mixture (*see page 31*) may also be used; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting.

Sterilising Soil.—In order to destroy all injurious insect life it is a good plan to sterilise potting soil before adding the Phytobroma or bonemeal. We recommend for this purpose the KONDINE SOIL STERILISER, or small quantities of soil can be easily sterilised in a sack by pouring over it a large kettle of boiling water and then spreading out the soil to dry. This will prevent a great deal of after trouble from worms or insects attacking the bulb roots.

The pots should be carefully washed and allowed to dry before using; new pots should be well soaked. *Never pot in dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of charcoal (in preference to broken crocks) over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with pieces of charcoal, and a good layer of rough fibrous loam or leaf soil placed at bottom of box to ensure perfect drainage.

CULTURE OF BULBS IN POTS OR BOXES—continued.

Covering the Bulbs.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

After potting, stand the pots or boxes outside in the open, on a firm bottom such as a bed of gravel or a gravel path to prevent the entrance of worms. They should then be surrounded and completely covered with Peat Fibre, Cocoa Fibre, or old decayed leaf soil (ashes from gas works are dangerous as being often very poisonous to plant life), the top of the pots being 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots or boxes remain buried in this way they will require no watering.

The pots or boxes should remain plunged for about twelve weeks (Roman and Italian Hyacinths rather less), in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into flower. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. *On no account should bottom heat be given.* A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots; they are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Gladioli, Ixias, Sparaxis, Tritonias, Babianas, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, and protected with mats during severe frosty weather. There they should remain for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

**Culture of Spring-Flowering Bulbs in Vases and Bowls,
In Barr's New Peat-Fibre, Shell and Charcoal Mixture.**

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by using our **Peat-Fibre Mixture** (4s. 6d. per bushel, 1s. 3d. per peck); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil for growing bulbs in bowls and vases.

NARCISSUS POETAZ ELVIRA
growing in Barr's Peat-Fibre Mixture

Culture.—Fill the vase or bowl with the **Peat-Fibre Mixture** up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil; the mixture should be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, adopt either of the following plans:—

(a) The bowls may be placed outdoors and covered entirely with Peat-Fibre or Cocoa fibre, leaving them thus for 8 to 12 weeks (Early Roman and Italian Hyacinths rather less), when the bulbs will have made good fibrous roots.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark *airy* room, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, as they will of course have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to encourage root action. As soon as the bulbs are well rooted, water may be given more freely, the fibre mixture being then kept quite moist; **if the mixture**

is allowed at any time to become dry, even for a day, the flower buds will probably become blind; should by any chance too much water have been given the bowls may be drained by carefully tipping them on their side. If obtainable, rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, as it is necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn up. For a few days the bowls should be covered with tissue paper until the young growth has become accustomed to the light. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

For Collections of Bulbs for Bowl Culture, see page 6 of this Catalogue, and page 3 of our General Bulb Catalogue.

Naturalising Bulbs and Plants in Grass, Woodlands, etc.

BULBS NATURALISED IN GRASS IN A LONDON PARK.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many gems which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided. the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect. In planting under trees select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for Tulips and Lilies, etc., also summer- and autumn-flowering herbaceous plants. In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass*, **Barr's Bulb Planter** (see page 31) should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb, while by its use *the grass is not in the least disturbed*. Planting should not take place while the ground is hard, but after the first autumn rains. If the ground is poor, a compost of fresh soil with an abundance of *Crushed Bones* (7 lbs. to a bushel) or *Phytobroma* (3 lbs. to bushel) should be made and a little of the compost dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. It is advisable to cut the grass as late in Autumn as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following:—Alliums, Anemones, Anthriscums, Chionodoxas, Crocuses, Cyclamen, Daffodils, Dog's Tooth Violets (*Erythronium dens-canis*), Fritillaries, Funkias, Helleborus, Hemerocallis, Irises (Tall and Dwarf Flag), Muscari, Ornithogalums, Scillas (early-flowering), May-flowering Cottage Tulips, and Wood Hyacinths (Late-flowering Scillas).

Hardy Spring-flowering Carpeting and Bedding Plants

To associate with Spring-Flowering Bulbs in beds and borders.

For Spring decoration in association with bulbs the following plants will be found most useful. By their use as a groundwork or edging the most beautiful harmonies of colour may be obtained. Few sights in Spring are more beautiful than masses of the gold, white, and blue of the *Alyssum*, *Arabis*, and *Aubretia* associated with breadths of *Daffodils*, *Scillas*, *Muscari*, etc., or *Forget-me-Nots* (*Myosotis*) and Golden *Polyanthuses* mingling with *Daffodils* or with gorgeous and stately *Darwin Tulips*. The *Acœnas*, *Arenaria balearica*, *Herniaria glabra*, *Mossy Saxifragas*, and *Thymes* make beautiful carpets of foliage for the smaller and daintier spring bulbous flowers, such as *Narcissus Trilanderus*, *Chionodoxas*, *Small Crocus Species*, etc.

We have also included in this list a few larger-growing plants specially recommended for the Hardy Flower Border to continue the display of bloom from Spring to early Summer.

- | | | |
|---|---|---|
| ACENEA (New Zealand Bur), producing dense close carpets of evergreen foliage, rapid growers. each—s. d. | | |
| Buchananii , foliage beautiful soft pea-green, ht. 2 in. per doz. 6/6 | o | 7 |
| Inermis , producing close cushion of bronzy grey-green foliage; effective rapid carpeting plant. 6/6 | o | 7 |
| microphylla , very close-growing small bronze foliage covered in summer and autumn with crimson spiny balls; a good rock plant, ht. 1 in. per doz. 6/6 | o | 7 |
| ALYSSUM saxatile compactum (Gold Dust), covered during May with sheets of golden-yellow flowers, ht. 1 1/2 ft. per doz. 5/6 | o | 6 |
| " " clittrinum , masses of pretty lemon-yellow flowers, ht. 1/2 ft. 8/6 | o | 6 |
| ARABIS alba fl. pl. , covered with sprays of double pure white sweet-scented flowers, ht. 3/4 ft.; a lovely subject for associating with Tulips. per 100, 40/-; per doz. 5/6 | o | 6 |
| ARENARIA balearica , forming a close green carpet, 1/2 inch high; excellent for very small bulbous plants. per doz. 8/- | o | 9 |
| AUBRIETIA (Rock Cress), valuable for associating with the golden Alyssum and white Arabis , ht. 3 to 4 in. | | |
| Bridesmaid , a lovely new variety, raised at our Nurseries, soft blush-coloured flowers. per doz. 8/- | o | 9 |
| Dr. Mules , deep violet-purple. 6/- | o | 7 |
| Lavender , clear lavender-blue, beautiful cool colour. 8/- | o | 9 |
| Peter Barr , rich glowing purple. 6/- | o | 7 |
| CAMPANULA carpathica alba grandiflora , flowers pure white, 9 in. 8/- | o | 9 |
| " " Isabel , deep violet-blue, 9 in. 8/- | o | 9 |
| " G. F. Wilson , deep violet-blue, 4 in. 6/- | o | 7 |
| CANTERBURY Bells , to colour white, violet, rose or mixed. per 100, 18/-; 3/- | o | 4 |
| CERASTIUM arvense compactum , very close prostrate green foliage with a mass of white blossoms in early summer; a charming plant for covering banks. per doz. 5/6 | o | 6 |
| " tomentosum (Snow in Summer), foliage silvery grey, flowers white, ht. 4 in. 5/6 | o | 6 |
| CHEIRANTHUS Allioni , brilliant orange-coloured flowers, 1 ft.; handsome spring and early summer effect. per 100, 21/-; per doz. 3/- | o | 4 |
| COREOPSIS grandiflora 45/-; 6/- | o | 7 |
| DAISY, Barr's Giant Flowered Double Rose or White each 21/-; 3/- | o | 4 |
| DELPHINIUM Blue Butterfly , forming bushes of brilliant blue flowers about 1 foot high in early summer. per doz. 8/- | o | 9 |
| " grandiflorum , soft Cambridge blue, 2 ft. 8/- | o | 9 |
| " album , flowers satiny white, 2 ft. 8/- | o | 9 |
| FORGET-ME-NOT. See <i>Myosotis</i> . | | |
| FOXGLOVES, Pure White per 100, 30/-; 4/- | o | 5 |
| " Choice Mixed 18/-; 3/- | o | 4 |
| GENTIANA acaulis (The Garden Gentianella), large erect bell-shaped deep blue flowers in spring, in bloom more or less throughout the year. 1/2 ft. Strong clumps, per doz. 8/- | o | 9 |
| HELIANTHEMUM (Sun Rose), producing sheets of brilliantly coloured flowers in June, beautiful named varieties in distinct colours—rose, pink, white, yellow, or crimson. each per doz. 8/- | o | 9 |
| Mixed Colours , without names. 5/6 | o | 6 |
| HERNIARIA glabra , having a close green prostrate growth; evergreen and very hardy. 8/- | o | 9 |
| HOLLYHOCKS, Double or Single , to colour, summer-sown seedlings, to bloom 1920. 6/6 | o | 7 |
| IBERIS (White Perennial Candytuft), producing sheets of snow-white flowers in May. 8/- | o | 9 |
| IRIS, Dwarf Bearded or Crimean Irises , for spring flowering, excellent for massing in beds and front of permanent borders; after blooming, foliage a nice green throughout summer. | | |
| 100 in 20 beautiful named vars. 43/- | | |
| 1 each 25 " " " 15/- | | |
| 1 " 12 " " " 6/- | | |
| In Beautiful Mixture, without names. per 100, 25/-; per doz. 4/6 | | |

See also List of Irises in our General Bulb Catalogue.

SPRING-FLOWERING CARPETING AND BEDDING PLANTS—*continued*.

IRIS, Tall Bearded and hardy border species, for summer flowering.

Our collection of these lovely border Irises is the finest and most complete in existence. The plants offered are strong and will bloom 1920. For full list of varieties and species see our General Bulb Catalogue.

COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS AND POT CULTURE.

Barr's 25/- Collection of Daffodils for Flower Borders.

The following varieties are all beautiful in the flower border, and the selection embracing early and late varieties gives a good succession of bloom. All are suitable for pot-culture and will give an equally fine display in the greenhouse or sitting-room.

ALL STRONGEST SELECTED BULBS.		
6 Emperor	6 Incomp. Lucifer	6 Leedsli Salmonetta
6 Golden Spur	6 " Sir Watkin	6 Odorus Campanello
6 Princess Ida	6 Barril conspicuus	6 Poetaz Elvira
6 Bicolor Empress	6 " Mascotte	6 Poeticus ornatus
6 " J. B. M. Camm	6 " Seagull	6 " Minerva
6 Incomp. Firelight	6 Leedsli Janet Image	6 Codlins and Cream (double)
6 " Frank Miles	6 " Mrs. Langtry	

3 Bulbs each of the above 20 varieties for 12/6

Barr's 45/- Collection of Daffodils for Pot Culture.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and later flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well-watered previously, should it be dry) they will mostly flower well outdoors the following season. *For Cultural Directions see pages 1 and 2.*

ALL STRONGEST SELECTED BULBS.		
6 Emperor	6 Bicolor J. B. M. Camm	6 Leedsli Falry Queen
6 Glory of Lelden	6 Incomp. Fireflame	6 " Janet Image
6 Henry Irving	6 " Lucifer	6 " Maid of Athens
6 Lady Audrey	6 " Sir Watkin	6 Poetaz Elvira
6 Madame de Graaff	6 Barril Albatross	6 Poeticus Cassandra
6 Princess Ida	6 " Mascotte	6 " Herrick
6 Bicolor Cygnet	6 " Seagull	6 Codlins and Cream (double)
6 " Empress	6 Leedsli Duchess of Westminster	6 Campanelle Jonquill

 In addition to the above we recommend all the Polyanthus Narcissi offered on page 25.

Barr's Flower Border Mixture of Daffodils.

Although we are of opinion that a better effect is obtained by planting named varieties in separate groups, there are many who prefer a general mixture, especially for filling large beds, and the special mixture we offer here will be found admirably suited to this purpose.

Barr's Flower Border Mixture of Trumpets, Chalice Cup and Poet's Narcissi.

strong flowering bulbs, per 100, 15/-; per doz, 2/3.

Miniature Daffodils for the "Rock Garden."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. The ground may be carpeted with close-growing surface-rooting plants, such as *Acena*, *Mossy Saxifragas*, and *Thymes*, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed in rainy weather.

Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

Barr's New Seedling Daffodils

Including Many New Varieties for 1919

The following list of Daffodils comprises some of the finest novelties, and includes New Seedlings of our own raising and many of the best raised by other hybridists. We would specially draw attention to the following grand exhibition kinds: **Anchorite**, **Caedmon**, **Challenger**, **Danesfield**, **Empire**, **Golden Chief**, **Lemon Frill**, **Masterpiece**, **Milk and Honey**, **Mrs. D. V. West**, **Primrose Gem**, **Prince Fushimi**, **Prince Arthur**, **Red Beacon**, **Ringdove**, **Sheba**, **St. Olaf**, **St. Wendrona**, **Socrates**, **Tamora**, **Volcano**, and **White Pearl**—all of great beauty.

We have been awarded for New Seedling Daffodils—

The Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for Twelve Best Seedling Daffodils not in commerce.

The Walter Ware Challenge Cup for the Best New Triandrus Hybrids.

The R.H.S. Silver Standard Cup for the Best 12 New Seedling Daffodils.

The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being earliest, (6) being latest.

	each.
l s. d.	
Alope (Triandrus Hybrid) (4) xxx, <i>new</i> 1919, flower large with primrose-yellow perianth and bold canary-coloured trumpet, ht. 13 in.	0 10 6
Anchorite (Barrii) (5), xxxx, <i>new</i> 1914, a good solid flower, having broad long snowy white perianth of great substance and large spreading crown of a delicate lemon-yellow, prettily frilled at margin and having a dark green eye, a very cool-looking chaste flower, ht. 19 in. Socrates (Poeticus) (5), xxxx, <i>new</i> 1910, the deepest edged Poeticus at the Birmingham Show, 1910, a very striking and noble flower, measuring over 3 in. across with very solid white broad perianth, well-imbricated, centre canary with a remarkably deep margin of dark madder-scarlet, ht. 15 in. AWARD OF MERIT R.H.S. and BIRMINGHAM.....		0	5	6
Sunny Lass (Barrii) (3), xx $\frac{1}{2}$, <i>new</i> 1919, a very showy flower, perianth white, cup expanded, bright yellow, very broadly margined scarlet; a good bedder, ht. 15 in.per doz. 30/-		0	2	9
Sweet Nancy (Jonquil Hybrid) xxx, <i>new</i> 1919, flower 3 inches across, of a nice soft colour, perianth soft yellow, broad and imbricated, crown short, bright yellow, deeply flanged, fragrant, ht. 22 in.		0	10	6
Tamora (Trumpet Daffodil) (4), xxxx, <i>new</i> 1918, a most lovely flower, large, and of perfect form, perianth snow-white, broad, smooth and flat, trumpet creamy white, elegantly flanged at mouth, ht. 16 in.		1	1	0
†The Grey Mare , xxxx, a very lovely flower of large size with a solid white slightly campanulate perianth, and large creamy-white trumpet, expanded and flanged at mouth, ht. 16 in.		1	1	0
Viola (Barrii) (4), xxx, <i>new</i> 1919, perianth ivory-white, cup lemon with greenish eye, prettily fluted, ht. 15 in.		0	10	6
Volcano (Double Incomparabilis), xxxx, the most brilliantly coloured of the Double Incomparabilis varities, flowers measuring over 3 inches across, primrose-yellow with large brilliant orange centre shaded scarlet, very decorative, ht. 16 in.		1	1	0
White Knight (4), xxxx, a beautiful flower, slightly drooping with snowy white smooth perianth and long straight white trumpet, ht. 16 in.		0	10	6
White Pearl (Giant Leedsii) (4), xxxx, <i>new</i> 1919, flower snowy white throughout, measuring 4 $\frac{1}{4}$ inches across, perianth broad, crown resembling a short broad trumpet, expanded at mouth and regularly frilled; a very lovely flower, ht. 18 in.		2	2	0

Barr's New Seedling Nerines.

The most beautiful of Autumn-flowering Bulbs for the cool greenhouse, of very easy culture.

For full Descriptive List, see page 29.

Barr's "Gold Medal" Daffodils

Awarded Forty-six Gold Medals, Three Silver Challenge Cups, and Two R.H.S. Silver Cups for New Seedlings

Also many First-class Certificates and other high awards.

For Alphabetical Index, see p. 2 of Cover. New Seedling Varieties, p. 8.

Classification.—In the following pages we have practically adopted the 1910 classification of the R.H.S. Narcissus Committee, which we hope will be of assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, 10 distinct divisions have been made together with a section (Div. XI.) at the end to take in a few unclassified species and hybrids. With each division we have given its distinguishing character.

Time of Flowering.—The relative period of flowering of the different varieties out of doors we have denoted by means of numbers after the names, (1) being the earliest, (6) being the latest.

Height.—The heights given in inches are as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—* The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are, however, in most cases also splendid border varieties.

§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

Time to Plant.—The best time to plant, to obtain the finest flowers, is early Autumn (as early as possible), *although bulbs may be put in as late as Christmas with fairly satisfactory results*; we have planted some Daffodils as late as the second week in February, and had some very good blooms in May. We recommend, however, *early* planting for best results.

Depth to Plant.—Failures with bulbs are most frequently due to their having been planted too deeply or too shallow. A good general rule to follow is to cover the bulb with soil once and a half to twice its own depth, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil.

DIVISION I.—TRUMPET DAFFODILS.

DISTINGUISHING CHARACTER.—TRUMPET OR CROWN AS LONG AS OR LONGER THAN THE PERIANTH SEGMENTS.

(A) YELLOW AND SULPHUR-COLOURED TRUMPET DAFFODILS.

With Yellow, Lemon or Sulphur-coloured Trumpets, Perianth of same shade or lighter (but not white).

†**C. H. Curtis** (3), xxx, a handsome variety with large flower of fine form having a deep per doz. each. primrose broad perianth, and a bold golden-yellow trumpet with expanded brim, s. d. s. d. ht. 16 in. 10 6...1 0

†**Cleopatra** (4), xxxx, raised at our Nurseries, a magnificent variety, flower large and of perfect form and colour; very broad yellow imbricated perianth and long bold deep yellow trumpet, ht. 15 in. AWARD OF MERIT R.H.S. AND AT BIRMINGHAM. In April 1915, it was awarded at Birmingham the Second Prize for the FINEST YELLOW TRUMPET DAFFODIL in the show 30 0...2 9

YELLOW TRUMPET DAFFODILS—*continued.*

- §†**Cornelia** (3), xxx, flower large, of a soft canary-yellow with expanded trumpet and broad smooth perianth, ht. 18 in.; it makes a good pot plant and is a splendid bedder. AWARD OF MERIT R.H.S., 1905 per doz. each s. d. s. d. 18 6...1 9
- §†**Emperor** (3), xx, perianth deep primrose, trumpet rich full yellow; should be largely grown in flower-beds and borders and naturalised in grass; it is an excellent market flower and forces well, ht. 21 in.per 1000, 170/-; per 100, 18/6 2 8...0 3
- †**George Philip Haydon** (3), xxx, a large and refined flower, perianth primrose, broad and of fine texture, trumpet bold, canary-yellow with large open mouth boldly fluted and flanged, ht. 18 in. 25 0...2 3
- †**Gloria of Leiden** (3), xx, a very bold Giant Trumpet Daffodil, the flowers staring one full in the face, trumpet rich full yellow, perianth pale yellow, sometimes with deeper yellow markings, ht. 14 in.; a good forcer. AWARDED FIRST-CLASS CERTIFICATE R.H.S., 1887.....per 100, 63/- 8 6...0 9
- §†**Golden Bell** (2), xx, broad light yellow twisting perianth, large bold golden trumpet, with finely frilled open mouth, free bloomer, ht. 14 in.per 100, 25/- 3 6...0 4
- †**Golden Chief.** See *New Seedling Daffodils*, page 9.....each £1 10s.
- §†**Golden Spur** (1), xx, native of the Netherlands, perianth large and spreading, trumpet large and distinctly lobed, deep rich self-yellow; an early forcer and a showy Daffodil for borders and grass, ht. 18 in. per 100, 21/- 3 0...0 4
- §†**Henry Irving** (1), xx, a native of the Netherlands, broad spreading yellow perianth, large yellow trumpet, handsome flower, excellent for forcing, also for cultivation in grass or borders, ht. 18 in.per 100, 21/- 3 0...0 4
- †**King Alfred** (1), xxxx, a remarkably handsome Daffodil which we can strongly recommend; flowers of large size, great substance, and refined finish; colour a uniform intense rich golden; trumpet large and of elegant form, with open deeply frilled mouth; very tall vigorous grower and free bloomer; foliage of a handsome bluish shade, ht. 24 in. It forces early and is greatly prized as a cut flower for vases. FIRST-CLASS CERTIFICATE R.H.S., and R.B.S. LONDON, 1899 18 6...1 9

DAFFODIL LORD ROBERTS.

- †**Lord Roberts** (3), xxxx, a grand Trumpet Daffodil, raised at our Nurseries; flowers of enormous size, golden-yellow, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution, height 23 in. Awarded FIRST-CLASS CERTIFICATES by the R.H.S., MIDLAND DAFFODIL SOCIETY, CORNWALL DAFFODIL SOCIETY 1901, and DEVON DAFFODIL SOCIETY 1905. See *Illustration* 15 0...1 6

- §†**Maximus** (2), xxx, a very beautiful and graceful flower of a uniform rich deep golden-yellow, perianth elegantly twisted, ht. 18 in.; it is one of the richest coloured yellow Trumpet Daffodils, but rather a shy bloomer. It seems to do best planted 9 to 12 inches deep..... per 100, 32/6 4 6...0 5

- †**Michael** (3), xxxx, new 1910, a beautiful and refined Giant Yellow Trumpet Daffodil, flowers of a clear soft yellow, with a broad, slightly campanulate perianth of great substance, trumpet of beautiful form and of solid texture, plant of fine erect habit, ht. 19 in. AWARD OF MERIT R.H.S. 1916 60 0...5 6

- ***Minor, true** (1), a most graceful and charming very early-flowering miniature Daffodil of *Maximus* form, flowers with full yellow perianth gracefully twisted, and the miniature trumpet elegantly flanged at mouth, ht. 6 in.; valuable for edgings and rock-work, now very scarce 18 0...1 9
- " " " " " Extra large bulbs 25 0...2 3

YELLOW TRUMPET DAFFODILS—*continued*.

- Minimus, true** (1). We are glad to be again able to offer this little gem. It is about the smallest and dwarfest of all Daffodils, and produces outdoors in February dainty little trumpet flowers of a rich full yellow, height about 3 inches. It likes a peaty soil and may be naturalised on rockeries or in grass, or grown in pots or pans for the Alpine house. In 1887, during a tour in Spain, the late Mr. Peter Barr found this miniature Daffodil growing freely amongst gorse, with a south aspect. *For our annual supply we have to depend upon collected bulbs which are taken up while the foliage is green; in consequence there is a possibility that all the bulbs may not bloom the first season, but a proportion will* per 100, 25/- 3 6...0 4
- †**Monarch** (3), xxx, raised at our Nurseries, a noble flower, and one of the most refined of all the Giant Golden Trumpets; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in. 21 0...2 0
- ***Nanus, true** (1), rich full yellow, very dwarf and early, a gem for edgings and naturalising on grassy banks, etc., ht. 6 in.; now very scarce. *Lobularis is generally sold for it, but is very different in many ways*per 100, 42/- 5 6...0 6
- †***Obvallaris (Tenby Daffodil)** (1), xx, a charming little Daffodil with flowers of pleasing symmetry, perianth and trumpet full yellow, *very early*; it is best grown in partial shade, and is a fine variety for naturalising in grass, ht. 12 in. *We much regret having failed to obtain any good bulbs of this variety this season; we recommend in its place either Henry Irving or Golden Spur.*
- §†**Olympia** (3), xxx, a good showy variety with bright yellow perianth and a bold deep yellow trumpet of enormous size, ht. 21 in. AWARD OF MERIT FOR POT CULTURE R.H.S., 1914 12 6...1 3
- †**Rev. D. R. Williamson** (3), xxx, raised at our Nurseries, colour rich yellow with long handsome trumpet, a fine bold flower, ht. 19 in. 10 6...1 0
- §**Santa Maria** (1), xxx, found by the late Mr. Peter Barr in Spain, very deep golden-yellow, perianth elegantly twisted, a distinct and charming early flower; recommended for naturalising in grass, woodlands, etc., ht. 14 in. 7 6...0 8

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 1). *The varieties marked thus * thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.*

LADY AUDREY.

- †**Alice Knights** (1), xxx, raised at our Nurseries, the earliest of white Trumpet Daffodils and a beautiful flower; perianth white, trumpet creamy white of elegant form with prettily frilled open mouth; the whole flower is of great substance and lasts well, whether cut or on the plant; ht. 14 in. AWARD OF MERIT R.H.S. 1915, as a pot plantper 100, 75/- 10 6...1 0
- †**Cernuus true** (1), xx, perianth and trumpet silvery white and of the same length, a beautiful early-flowering variety; best grown in shade or grass, ht. 10 in. 7 6...0 8
- Helicé.** See New Seedling Daffodils, page 9 — 15 0
- †**Henri Vilmorin** (3), xxx, a beautiful white Trumpet Daffodil of refined texture and form; trumpet long and of great substance, perianth spreading and of *Empress* shape, flower $4\frac{1}{4}$ in. across, ht. 15 in. AWARD OF MERIT R.H.S. 1904 15 0...1 6
- †**Lady Audrey** (5), xxx, raised at our Nurseries, a flower of great beauty, white perianth slightly campanulate and long straight bold trumpet widening at mouth, cream-coloured passing off white, a fine free-flowering garden plant, ht. 15 in. AWARD OF MERIT BIRMINGHAM 1902. See Illustration aboveper 100, 35/- 5 0...0 6
- †**Loveliness** (4), xxx, a flower of remarkable beauty, with bold stiff snowy white perianth, broad and smooth, and a very elegant white trumpet, expanding at mouth, ht. 14 in. AWARD OF MERIT BIRMINGHAM and TRURO 12 6...1 3

WHITE TRUMPET DAFFODILS—*continued*.

- †**Madame de Graaff** (4), xxx, a beautiful and graceful variety which must always take a prominent position among the pale-coloured trumpet Daffodils. The perianth is pure white while the trumpet opens a soft primrose shade passing off almost white, ht. 16 in. Charming in pots, and will bear gentle forcing; always a favourite variety at Daffodil Exhibitions. FIRST-CLASS CERTIFICATE R.H.S. 1887per doz. each. s. d. s. d.
- ***Moschatus of Haworth** (The Snowy White Daffodil of the Spanish Pyrenees) (1), variable in size of flower. A charming dwarf variety, and a gem to naturalise in grass, delighting in partial shade and on grassy slopes facing north, ht. 6 in. *The war being over, we are glad to say that we have been able to get a few of this beautiful little variety again in the Pyrenees*per 100, 25/- 7 6...0 8
- Mrs. D. V. West.** See New Seedling Daffodils, page 9each £2 2s. — ... —
- †**Mrs. George H. Barr** (4), xxxx, a very lovely Daffodil of chaste form and highest quality, perianth snowy white and slightly campanulate, elegant white trumpet well open at mouth; a flower of great substance and smoothness, ht. 16 in. AWARDS OF MERIT R.H.S., MIDLAND DAFFODIL and CORNWALL DAFFODIL SOCIETIES 1903 ... 21 0...2 0
- †**Mrs. H. D. Betteridge** (4), xxx, a very refined and beautiful snowy white flower, perianth well formed, broad and imbricated, with a distinct fluting on surface, trumpet of model form with elegantly flanged and fluted brim, ht. 16 in. 10 6...1 0
- †**Mrs. Robert Sydenham** (4), xxx, pure white broad perianth of great substance, trumpet pure white and beautifully frilled at mouth, very elegant, ht. 14 in. AWARD OF MERIT R.H.S. 60 0...5 6
- Noblesse.** See New Seedling Daffodils, page 9each £1 1s. — ... —
- †**Peter Barr** (3), xxxx, a grand variety, raised at our Nurseries, flower large and bold, of beautiful symmetry and fine substance, with pure white campanulate perianth and large handsome ivory-white trumpet of elegant outline. It is a strong grower and free bloomer, with handsome deep bluish green foliage, ht. 15 in. Awarded FIRST-CLASS CERTIFICATE R.H.S. 1902 and CORNWALL DAFFODIL SOCIETY 1903. AWARDS OF MERIT DEVON DAFFODIL SOCIETY, R.B.S., LONDON 1904, and at HUNTINGDON 1906 36 0...3 6
- †**Philippe de Vilmorin** (5), xxx, a large and elegant flower with white perianth and long bold cream-coloured trumpet; a good free grower with bluish green foliage, ht. 14 in. This variety is growing freely in the rock garden of the Royal Horticultural Society at Wisley, where in Spring it is the admiration of all visitors 48 0...4 6
- §†**Princess Ida** (1), xx, white perianth, elegant white trumpet, with brim flanged and edged yellow; a charming variety either for border or pot culture; an excellent forer, ht. 16 in.per 100, 25/- 3 6...0 4
- Tamora.** See New Seedling Daffodils, page 10each £1 1s. — ... —
- The Grey Mare.** See New Seedling Daffodils, page 10each £1 1s. — ... —
- White Knight.** See New Seedling Daffodils, page 10 — 10 6

(C) BICOLOR TRUMPET DAFFODILS.

With White or Whitish Perianth and a Yellow, Lemon, or Pale Primrose Trumpet.

WEARDALE PERFECTION.

- ***Apricot** (3), xx, an attractive variety with per doz. each. s. d. s. d.
white perianth and a long straight trumpet
which opens soft primrose passing to a rosy
apricot-buff, and has a pleasing violet fragrance,
ht. 16 in. AWARD OF MERIT R.H.S., 1898 15 0...1 6
- §†**Calpurnia** (3), xx, raised at our Nurseries,

- §**Princeps** (1), x, perianth sulphur-white, trumpet yellow, a fine Daffodil for naturalising in woodlands, grass, etc., ht. 16 in.per 1000, 85/-; per 100, 9/- 1 4...0 2
- Queen Maya**. See *New Seedling Daffodils*, page 10.....each £1 1s. — ... —
- St. Wendrona**. See *New Seedling Daffodils*, page 10each £2 2s. — ... —
- †**Seraphine** (2), xxx, raised at our Nurseries, flower of immense size, perianth creamy white, broad, and with elegant twist, trumpet very large and bold, of a soft delicate lemon, with broadly crimped open mouth, very beautiful, ht. 18 in. 60 0...5 6
- †**Victoria** (1), xx, flowers large, erect, and of fine form with creamy white broad perianth, trumpet clear yellow, large, broad, and of great substance. It forces freely and under glass the perianth comes pure white, ht. 16 in. AWARD OF MERIT R.H.S., 1897 per 100, 25/- 3 6...0 4
- †**Weardale Perfection** (4), xxx, this fine Daffodil still ranks high among the Giant Trumpets as a flower of refined beauty; it has a large white perianth, and a soft primrose trumpet, of immense size, ht. 24 in. It makes a good pot-plant and may be gently forced. AWARDED A FIRST-CLASS CERTIFICATE R.H.S., 1894, and PREMIER PRIZE by the MIDLAND DAFFODIL SOCIETY. Blooms of this Daffodil have been exhibited measuring 5 inches across. See *Illustration*, page 14 15 0...1 6

INCOMPARABILIS LUCIFER.

DIV. II.—INCOMPARABILIS

Large Chalice-Cupped Daffodils or Star Narcissi.

DISTINGUISHING CHARACTERS.—CUP OR CROWN MEASURING FROM ONE-THIRD TO NEARLY THE LENGTH OF THE PERIANTH SEGMENTS.

All the varieties have yellow or white perianth and yellow or red-stained cups.

These beautiful **Star Narcissi** commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (*see pages 1 & 2*). They make charming pot plants, while in beds and borders they are very showy and naturalised in grass they produce a graceful effect. *We illustrate Lucifer as an example of a flower in this Division.*

- §†**Bedouin** (4), xxx, flower large, perianth broad and white, cup fiery orange-scarlet, per doz. each. elegantly fluted and crinkled at brim; strong free grower, ht. 22 in. 1ST-CL. CERT. s. d. s. d. EDINBURGH. AWARD OF MERIT LIVERPOOL. AWARD OF MERIT FOR GARDEN DECORATION AND CUTTING R.H.S. 1914. 15 0...I 6
- †**Bernardino** (3), xxxx, a very beautiful flower, with large broad creamy perianth and a very large pale cup, prettily fluted and heavily stained deep orange-apricot, a good free grower, ht. 22 in. AWARD OF MERIT HAARLEM, 1916 60 0...5 6

Barr's New Peat-fibre, Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Jardinets, etc., 4/6 per bushel; 1/3 per peck.
For Full Cultural Directions, see page 2. For suitable Bowls, see page 32.

BARRII SEAGULL.

Example of a Flower in Division III.

DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi.
(Including those hitherto classed as Burbidgei.)

DISTINGUISHING CHARACTER.—CUP OR CROWN MEASURING LESS THAN ONE-THIRD THE LENGTH OF THE PERIANTH SEGMENTS.

All the varieties have yellow or white perianth and yellow or red-stained cups.

For a long time trouble was being experienced in the placing of certain new seedlings under the **Barrli** and **Burbidgei** sections, as the two divisions ran so much into one another. The revising committee therefore decided to make only one section of them, retaining the name **Barrli**.

The chaste beauty of these shorter-cupped **Narcissi** is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

LEEDSII ARIADNE.

DIVISION IV.—LEEDSII.

Eucharis-flowered or Silver-White
Fragrant Star Narcissi.

Comprising all Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream, buff-orange, apricot or pale citron.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the *Incomparabilis* and *Barrii* forms, seeing how distinct a "colour" section it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

TRIANDRUS ALBUS ON ROCKWORK.

DIV. V.—TRIANDRUS AND TRIANDRUS HYBRIDS.

Under this division are placed *Triandrus* varieties and all hybrids obviously containing *Triandrus blood*, such as *Queen of Spain* (a wild *Triandrus* Hybrid), *Agnes Harvey*, *J. T. Bennett-Poë*, *Madonna*, etc.

The introduction of *Triandrus* blood in hybridising has resulted in such a very distinct group of hybrids that the Classification Committee of the R.H.S. deemed it advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend them being given a situation partly shaded by trees, and if a little very fine dwarf grass seed is sown amongst them, the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

NARCISSUS TRIANDRUS.

The Cyclamen-flowered Daffodils with reflexing perianth.

THE DAINTY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants (three or more bulbs in a pot), and grown thus should be given cold frame culture. Established on rockwork they form a picture full of grace and beauty. They prefer shade, a gritty soil, and a well-drained position.

†**Triandrus albus** (3), an exquisitely beautiful little species, appropriately called the "Angel's Tears" Daffodil; it is of slender growth, and produces a cluster of elegant little creamy white flowers with globular cup and perianth reflexing as in the Cyclamen, ht. 7 in. We are glad to be able to again offer our customers some collected bulbs of this little Daffodil. As these have to be taken up while the foliage is still green, a proportion may possibly not bloom the first season. The bulbs should therefore be left undisturbed to establish themselvesper 100, 17/6 2 6...0 3
Selected largest bulbs, ,, 25/- 3 6...0 4

†**Triandrus calathinus** (3). One of the most beautiful little Daffodils in existence. The flowers, which are produced in drooping clusters of two or three, are snowy white, and more than twice the size of *Triandrus albus*, with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 7 in. For pot culture and rockwork it is a perfect gem. The late Mr. Peter Barr collected this rare Daffodil some years ago on one of the Glénan Isles, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all trace of it, but we have been able to successfully raise it from seed 25 0...2 3

†**Triandrus pulchellus** (4), producing elegant clusters of flowers like *Triandrus concolor*, but the perianth is primrose and the cup white, a very scarce and beautiful little Daffodil, ht. 9 in. — ...3 6

NARCISSUS TRIANDRUS HYBRIDS.

Of these **QUEEN OF SPAIN** is a natural hybrid of *Triandrus albus* and a wild trumpet Daffodil. The other varieties have all been produced by using *Triandrus albus* or *calathinus* pollen on trumpet and other Daffodils. They form a distinct class, having flowers more or less drooping, of elegant form and graceful habit, clearly showing their *Triandrus* parentage.

NARCISSUS QUEEN OF SPAIN.

§†**Queen of Spain** (3), xxx, found by the late Mr. Peter Barr in Spain. One of the most beautiful, distinct, and graceful Daffodils in cultivation, and recommended either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in the Peat-fibre mixture, and grown thus affords an artistic decoration for the sitting-room. Our annual collections of this lovely Daffodil were stopped by the war, but this year we are pleased to say we have been able to obtain a supply which we now offer. Owing to the bulbs having to be taken up while the foliage was still green, some may not bloom the first year, but we expect a good proportion to do soper doz. each. s. d. s. d.

DIVISION VI.—NARCISSUS CYCLAMINEUS

The Yellow Cyclamen-flowered Daffodil of Portugal.

We managed this year to get a small supply of this little species collected for us, but unfortunately the Import Restrictions Department have refused to grant us the necessary permit to import them.

DIV. VII.—JONQUILLA AND JONQUIL HYBRIDS.

Under this division are placed the Single Jonquil and all Daffodil hybrids where the characteristics of the Jonquil parent dominate, such as *Odorus*, etc.

†**JONQUILLA** (The Single Sweet Jonquil) (5), xxx, of light elegant growth, bearing out of doors in May charming clusters of numerous small rich yellow flowers of delicious scent, much prized for cutting, ht. 13 in. It produces a pleasing effect when grown in pots or bowls for indoor decorationper 1000, 70/-; per 100, 7/6 1 3...0 2

†**Buttercup** (4), xxx, a cross between *Emperor* and *Jonquilla*, flower of very distinct handsome form, borne on a long stem; colour rich Buttercup-yellow, almost a self, with broad stiff perianth very slightly reflexing and of same length as the trumpet, which is straight and of great substance; the flower has a delicate Jonquil perfume, ht. 21 in. Sweet Nancy. See New Seedling Daffodils, page 10 — 10 6

§†**Odorus Campanelle** (Campanelle Jonquil) (2), xx, native of France, having an elegant rush-like foliage and clusters of bright yellow fragrant flowers, ht. 18 in.; valuable for border decoration and early forcing in pots.....per 1000, 80/-; per 100, 8/6 1 3...0 2

For the Double Jonquil and Double Campanelle Jonquil, see page 27.

DIVISION VIII.—TAZETTA & TAZETTA HYBRIDS.

Under this Division are placed the Polyanthus or Bunch-flowered Narcissi, Poetaz Narcissi, Tridymus, and various Tazetta Hybrids.

POLYANTHUS OR BUNCH-FLOWERED NARCISSI.

When grown outdoors in beds or borders, a little protection should be given during winter by means of a light covering of straw litter or cut heather.

All extra strong bulbs suitable for forcing.

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

New hybrids of *Poeticus Ornatus* × Best Forms of Polyanthus Narcissi.

POETAZ ELVIRA.

A fine new race of Daffodils, resulting from a cross between *Poeticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the *Poeticus* being the seed-bearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer and more showy than the old Polyanthus Narcissi, and have the advantage of being much hardier. In pots or the flower border they are very decorative, while the flowers are highly prized for cutting. They can easily be brought into bloom early by gentle forcing.

- §†**Aspasia** (3), xxx, producing four to five large per doz. each.
bold flowers on a stem, with broad solid s. d. s. d.

good form, ht. 21 in. 7 6...0 8
- §†**Klondyke** (4), xxx, a fine showy variety with primrose-yellow perianth and golden
fluted cup, five to seven large flowers on a stem 7 6...0 8
- §†**Triumph** (3), xxxx, bearing about three very large flowers on a stem, perianth broad
and snowy white, cup golden-yellow prettily fluted, ht. 16 in. 5 6...0 6

VARIOUS TAZETTA HYBRID

- §**TRIDYMUS Cloth of Gold** (3), xxx, a very striking and decorative bedding
variety lasting long in condition, each stem bearing three to five sweetly scented flowers
of the richest golden-yellow; a robust grower and free bloomer, valuable as a cut flower,
ht. 14 in. 7 6...0 8
- CANALICULATUS**, a dainty little species only suitable for sunny situations on rock-
work; it has narrow erect bluish green foliage and bears heads of 3 to 4 flowers with
white reflexing perianth and globular golden cup, sweetly scented, ht. 6 in.per 100, 32/6 4 6...0 5
- §**INTERMEDIUS "SUNSET"** (3), xxx, canary-yellow perianth and large glowing
orange-red cup, 4 to 5 flowers on a stem, remarkably showy, ht. 16 in. AWARD OF
MERIT R.H.S. 7 6...0 8

DIVISION IX.—POETICUS—True Poet's Narcissi.

These "Poet's" Daffodils or Narcissi all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, and sometimes almost all scarlet. All are sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced. As border plants and naturalised in grass by themselves the Poet's Narcissi produce a lovely effect.

Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.

DIVISION X.—DOUBLE VARIETIES.

(A) DOUBLE TRUMPET DAFFODILS.

All the Double Trumpet Daffodils thrive admirably when planted in grassland and allowed to remain undisturbed. They are seen to great advantage when planted in clumps in permanent borders, and as pot-plants they are very attractive (several bulbs in a pot).

- †***Capax Plenus** (*syn. Eystettensis*), Queen Anne's Double Daffodil (1), xxx, per doz. each native of Ireland, beautiful soft pale lemon-coloured flowers, consisting of six rows of petals, symmetrically arranged over each other in the form of a star, ht. 7 in. 10 6...1 0
- §†**Telamonius Plenus** (Wilmer's Great Double Golden-yellow Daffodil) (2), xx, the large Old Double Yellow Trumpet Daffodil; valuable for naturalising in woodlands, etc., also for early forcing Good bulbs for naturalising, per 100, 15/- 2 3...0 3
- „ „ Extra strong bulbs for pot-culture and forcing, etc.per 100, 25/- 3 6...0 4

(B) DOUBLE INCOMPARABILIS NARCISSI.

The Double Rose-flowered Daffodils.

The large massive flowers of these are greatly prized for bouquets and vases, mixing well with other flowers and foliage in decoration. As pot plants (3 to 6 bulbs in a pot) they are very charming, while in beds, borders, or naturalised they make a most effective display.

DOUBLE NARCISSUS, ARGENT.

- §†**Argent** (3), xxx, a beautiful cross between *Telamonius plenus* and *Poeticus ornatus*, bearing very beautiful and elegant star-shaped semi-double flowers of erect bearing with creamy white petals and yellow centre, ht. 18 in. It may be gently forced early in pots, per 100, 21/- 3 0...0 4
- §†**Butter and Eggs.** See Golden Rose (an improved form of the old Butter and Eggs)
- §†**Codlins and Cream** (*syn. Sulphur Phoenix*) (3), xxx, large double white rose-shaped flowers with sulphur centre, very chaste and beautiful; much prized for bouquets, vases, etc., ht. 18 in.per 100, 21/- 3 0...0 4
- †**Eggs and Bacon (Orange Phoenix)** (2), xx, large double rose-shaped flowers, white with rich reddish orange centre, ht. 17 in. per 100, 21/- 3 0...0 4
- §†**Golden Rose** (*syn. Pallidus Plenus*) (2), xxx, an improved form of the old Butter and Eggs Daffodil, flowers very large and round, rich light yellow with orange-golden centre, very double, handsome and showy, ht. 17 in.per 100, 15/- 2 3...0 3

Milk and Honey. See New Seedling Daffodils, page 9.....each £1 10s. — ... —

- §†**Primrose Phoenix** (4), xxxx, a valuable addition to this section of Double Daffodils; the large double rose-shaped flowers are of a beautiful soft lemon shade; much prized for vases, ht. 20 in. AWARD OF MERIT R.H.S. 1902..... 15 0...1 6

Volcano. See New Seedling Daffodils, page 10each £1 1s. — ... —

NERINES.

THE MOST BEAUTIFUL OF AUTUMN FLOWERS FOR THE GREENHOUSE.

A HYBRID NERINE.

For Autumn decoration in the greenhouse few plants can compare with **Nerines** for their brilliant and attractive colours, which form a pleasing contrast to the prevailing tints of this period of the year. The flowers, which are produced in umbels of 6 to 24 blooms, are borne on stout stems varying in height from 1 to 2 ft. In colour they range from *dark red, vivid crimson, cerise, and scarlet to salmon, coral-rose, pink, blush, and white*, many having a glistening lustre which in sunlight gives them the appearance of being dusted with gold or silver. In some cases the flowers have a well-defined bar or stripe running up centre of petal which adds to their charm. They remain decorative for many weeks, and their beauty may be enjoyed in a sitting-room as well as the greenhouse, if the pots are kept in a sunny window.

The cut spikes, which last fresh a long time, are greatly appreciated for table decoration associated with some light graceful foliage like that of Maidenhair Fern.

The varieties we offer below are mostly **New Seedlings**, comprising new shades of colour and new forms; they are freer bloomers, and in some cases of taller growth, and with larger flowers than any of the older kinds.

CULTURE.—**Nerines** can be very easily grown by anyone who has a glass structure from which frost can be excluded. *Plenty of air and sunshine* are their principal requirements. After the bulbs have finished flowering, place the pots on an airy sunny shelf close to the glass, and encourage a free foliage growth by giving occasionally a

little weak liquid manure. In April or May, when the foliage commences to turn yellow, cease giving water and allow the bulbs to ripen off in their pots. As soon as the plants show signs of making fresh growth in August or early September, stand the pots in saucers of water for a few hours to ensure the soil being uniformly moist, and then give water sparingly until the flower spikes are well advanced.

Nerines bloom most freely when well established in pots. Re-pot every third or fourth year. In potting, put in plenty of crocks to ensure good drainage, and use a compost of two-thirds good loam and one-third sand, with a sprinkling of well-decayed leaf soil or old manure and bonemeal.

Our Exhibit of New Hybrid **Nerines** was awarded by the R.H.S. a Silver Banksian Medal, November 1914, and a Silver Flora Medal November 1916.

	each—s.	d
Afterglow , rich glowing rose, petals margined pink, large open flower with waved petals, fine truss	42	0

MANURES, SOILS, PEAT-FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots**, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. Leaflet with further particulars on application. 2-lb. 1/-; 7 lb. 2/9; 14 lb. 5/6; 28 lb. 10/6; 56 lb. 20/-; 112 lb. 40/-.

Basic Slag, 14 lb. 1/9; 28 lb. 3/-; 56 lb. 5/6; per cwt. 10/6.

Bone Meal (*Genuine fine Crushed Bones*), best quality, 7 lb. 2/6; 14 lb. 4/9; 28 lb. 9s.; per cwt. 35/-.

Bone Flour, best quality, 7 lb. 2/6; 14 lb. 4/9; 28 lb. 9/-; per cwt. 35/-.

Nitrate of Soda, 7 lb. 3/-; 14 lb. 5/9; 28 lb. 11/-; 56 lb. 21/6; per cwt. 42/-.

Sulphate of Ammonia, 7 lb. 2/6; 14 lb. 4/6; 28 lb. 8/6; 56 lb. 16/6; per cwt. 32/-.

Sulphate of Potash (*very scarce*), 3 lb. 4/6; 7 lb. 9/6; 14 lb. 18/-; 28 lb. 35/-.

Superphosphate of Lime, 7 lb. 1/6; 14 lb. 2/3; 28 lb. 4/-; 56 lb. 7/6; per cwt. 14/6.

Vaporite, destroys Wireworm, Woodlice, and other injurious soil pests, small tin, 1/3; about 7 lb. tin, 3/-; about 14 lb., 4/6; about 28 lb., 6/6; $\frac{1}{2}$ cwt., 9/9; 1 cwt. 15/-.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 3/6.

Lime, fine ground, per bushel, 3/9.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of *Phytobroma*, per bushel, 3/6.

Barr's Improved Peat-fibre, Shell, and Charcoal Mixture for growing Bulbs in Bowls, Jardinets, Glasses, etc. In the case of glasses, half fill with the Fibre Mixture, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept moist. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. Our Fibre Mixture is sent out *ready for use*. 4/6 per bushel; 1/3 peck.

Peat-fibre, recommended in preference to Cocoa-fibre for plunging bowls, pots, etc., and as a winter mulch to bulb-beds, etc., per bushel, 2/-.

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, 6d. per quart; 3/6 per peck.

Charcoal (fine twig), per peck, 1/3; per bushel, 4/6.

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter, specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have

been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early Autumn rains, and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other tool with success. By the use of BARR'S SPECIAL BULB PLANTER a large number of

bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about $3\frac{1}{2}$ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2 inches diameter }
 " " " 2 $\frac{1}{4}$ " " } 18/6 each.
 " " " 2 $\frac{1}{2}$ " " }

We shall send the medium size (2 $\frac{1}{4}$ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6 $\frac{3}{4}$ lbs., length 36 inches over all. 12/6 each.

USEFUL TOOLS FOR BULB PLANTING, ETC.—*continued.*

New Pattern Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Bulbs are just showing; also a useful weeding tool.

With short handle ($12\frac{1}{2}$ inches over all), 3/- each; with 3 ft. handle (41 inches over all and weight under 1 lb.), 3/9 each; with 5 ft. handle ($5\frac{1}{2}$ ft. over all), 4/6 each.

Hand Fork (*Saynor*), finest quality, solid steel with three $4\frac{1}{2}$ inch solid flat prongs and 5 inch handle, a very superior tool, 3/- each.

" " " 12-inch handle, 3/9 each.

BARR'S BULB TROWEL.

Barr's Special Bulb Trowel, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 3/9 each.

Garden Trowel, solid cast steel, finest quality, 5 in., 2/6; 6 in., 2/9; 7 in., 3/6 each.

Cultivators, invaluable tools for breaking surface soil, 5 prong, $4\frac{1}{2}$ -ft. handle, 7/6 each; 3 prong, 4-ft. handle, 5/6 each; 3 prong, 21-in handle, 2/9 each.

BULB VASES AND BOWLS,

for growing Spring-flowering Bulbs in Barr's Peat-fibre Mixture.

The vases are of elegant shape, and without drainage holes, thus saving the use of saucers. They will be found most useful for Daffodils, Hyacinths, Tulips, Crocuses, Early Seillas, Snowdrops, Chionodoxas, Iris Reticulata, Jonquils, etc., either for table decoration or the greenhouse. During Summer they may be used for standing little pot-plants in and other table decorations.
